	mechanism? This is not required to be a subcontract. What is the payment mechanism?										
113	This is not required to be a subcontract. The government body that oversees NCLE also oversees all provincial public health offices, and therefore they are considered to be within the same overall organization. Any money that is provided to NCLE can easily be transferred within the organization to different departments, which includes provisional and district-level public health offices.

69	I need to clarify with Brian whether he wants to maintain these two behavior positions. We've been trying to book a call. They should be finished current work in August.		
70			
71	*What do you mean in the narrative when you say "transition services"? This would be in case there are administrative charges associated with ending contracts and laying off staff.

76	*This amount will need to be broken down. How much is for severance for staff, and how are those amounts calculated? Based on SL law and employment contracts. Spreadsheet is attached from HR. Rounded up (from \$28,987) as there is a slight disagreement about one start date.		
77	*Is this person a government employee? If yes and this is a top up, can't budget or pay it. Not a government employee. He did used to work for Ministry of Agriculture but has not been on their payroll for over a year. We confirmed this regularly. This agreement ended at the end of May. Adjusted as April was not billed yet.
